

## **WATER CONSERVATION—VOLUNTARY**

Water Conservation is always an important goal. Water conservation is important to support the health, safety and welfare of the customers of our water system community. Due to the higher temperatures and increased water usage, Levi Water is implementing the first phase of their water conservation and drought contingency plan.

Levi Water is encouraging water customers to voluntarily reduce water usage. We are requesting customers that have an account number ending in an even number (0, 2, 4, 6, 8) to restrict outside watering and recreational water usage to Sunday, Tuesday & Thursday and we strongly discourage any outside usage between 6:00 & 9:00 p.m.

We are requesting customers that have an account number ending in an odd number (1, 3, 5, 7, 9) to restrict outside watering and recreational water usage to Monday, Wednesday & Friday and we strongly discourage any outside usage between 6:00 & 9:00 p.m.

We are asking that there will not be any outside watering and recreational water usage on Saturday.

Levi Water is hopeful that the voluntary conservation plan will be effective in our efforts to conserve water and that we can avoid the implementation of the Mandatory Water Conservation and Drought Contingency Plan.

Please call 254.857.3050 or email [accounts@leviwater.com](mailto:accounts@leviwater.com) if you have any questions.
